Index of Papers Published in Journal of Hydronautics

Volume 9—January through October 1975

Issue	Pages
January	1-48
April	49-80
July	81-128
October	129-176

SYN, SA, EN, TC, and ERR indicate Synoptic, Survey Article, Engineering Note, Technical Comment, and Errata, respectively. All other items are regular full-length articles. In the Subject Index, papers are listed alphabetically by title, regardless of category.

SUBJECTS

AIRCRAFT TECHNOLOGY, VTOL

Ground- (or Water-Surface) Effect Machines

Nonlinear motion of an air-cushion vehicle over waves. L.J. Doctors 49

FLUID DYNAMICS

Boundary Layers and Convective Heat Transfer – Laminar

Boundary-layer formation for constant accelerated motion of an axially symmetrical body. C. Y. Liu and C. C. Cheng (EN) 75

Boundary Layers and Convective Heat Transfer – Turbulent

Leading-edge rotating cylinder for boundary-layer control on lifting surfaces. W. S. Johnson, J. S. Tennant, and R. E. Stamps (EN) 76

Measurement of the sublayer velocity profile with polymer additive. Humberto Aquino and Richard Lamontagne 32

Transitional and turbulent pipeflow of pseudoplastic fluids. Richard W. Hanks and Brad L. Ricks 39

Hydrodynamics

Addition to the reply by author to a comment by P. R. Payne. D. W. Sallet (TC) 128

Comment on "Shaping of axisymmetric bodies for minimum drag in incompressible flow." Peter R. Payne (TC) 127

Comment on "Turning moment on a rotating disk." Paul S. Granville (TC)174

——Reply by authors to P. S. Granville. J. Richard Shanebrook and David McMullan (TC) 174

Dynamic performance characteristics of an air cushion vehicle. J. A. Fein, A. H. Magnuson, and D. D. Moran 13

Effect of mesh size on the accuracy of finite-water added mass. C. H. Kim (EN) 125

Flow past an anchored slender ship in variable-depth shallow water. Allen Plotkin 103

Hydrodynamics of large objects in the sea. Part II: Motion of free-floating bodies. C. J. Garrison 58

Linearized theory of finite cavity flow around a thin jet-flapped hydrofoil. Teruhiko Kida and Yoshihiro Miyai 119

Low-aspect-ratio flat-ship theory. E. O. Tuck 3

Measurement of surface-wave statistics. H. Guthart, K. S. Krishnan, and N. A. Peppers 149

Note on the two force equations for a floating platform, A. Jin S. Chung (EN) 170

Reply by authors to P. R. Payne. Jerome S. Parsons, Raymond E. Goodson, and Fabio R. Goldschmied (TC) 128

Statistical mechanics of ocean waves. Bruce J. West, J. Alex Thomson, and Kenneth M. Watson 25

Technique for rapid friction factor fluid characterization. William K. George Jr., George B. Gurney, and Neil S. Berman 36

Transitional and turbulent pipeflow of pseudoplastic fluids. Richard W. Hanks and Brad L. Ricks 39

Turning moment on a rotating disk. J. Richard Shanebrook and David McMullan 46

Vortex-induced lift and drag on stationary and vibrating bluff bodies. Owen M. Griffin 160

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Addition to the reply by author to a comment by P. R. Payne. D. W. Sallet (TC) 128

Calculations of the turbulent wake behind slender self-propelled bodies with a kinetic energy method. Roy C. Swanson Jr. and Joseph A. Schetz (EN) 78

Linearized theory of finite cavity flow around a thin jet-flapped hydrofoil. Teruhiko Kida and Yoshihiro Miyai 119

Turbulent wake of an axisymmetric, self-propelled body. M. Robinson Swift (EN) 172

Vortex-induced lift and drag on stationary and vibrating bluff bodies. Owen M. Griffin 160

Multiphase Flows

Thrust of an air-augmented waterjet with a converging-diverging nozzle. Timothy T. Maxwell, Glennon Maples, and David F. Dyer 154

Nozzle and Channel Flow

Velocity distribution equation for laminar unidirectional flow in an equilateral triangular conduit. R. Elangovan (EN) 47

Viscous Nonboundary-Layer Flows

Calculations of the turbulent wake behind slender self-propelled bodies with a kinetic energy method. Roy C. Swanson Jr. and Joseph A. Schetz (EN) 78

Technique for rapid friction factor fluid characterization. William K. George Jr., George B. Gurney, and Neil S. Berman 36

Technique for rapid friction factor fluid characterization. William K. George Jr., George B. Gurney, and Neil S. Berman 36

Wave Motion and Sloshing

Measurement of surface-wave statistics. H. Guthart, K. S. Krishnan, and N. A. Peppers 149
Optimum filtering and smoothing of buoy wave data. Robert W. Severance Jr. 69
Statistical mechanics of ocean waves. Bruce J. West, Alex Thomson, and Kenneth M. Watson 25

INTERDISCIPLINARY TOPICS

Electric Power Generation Research

Floating ocean thermal power plants and potential products. G. L. Dugger, H. L. Olsen, W. B. Shippen, E. J. Francis, and W. H. Avery (SA) 129

Law, History, Policy, and Sociology

Operational maritime satellites—An evolving concept. Robert E. Fenton 165

Marine Propulsion System Integration

Thrust of an air-augmented waterjet with a converging-diverging nozzle. Timothy T. Maxwell, Glennon Maples, and David F. Dyer 154
Turbulent wake of an axisymmetric, self-propelled body. M. Robinson Swift (EN) 172

Marine Vessel Design (including Loads)

Comment on "Shaping of axisymmetric bodies for minimum drag in incompressible flow." Peter R. Payne (TC) 127
Hydrodynamics of large objects in the sea. Part II: Motion of free-floating bodies C. J. Garrison 58
Note on the two force equations for a floating platform, A. Jin S. Chung (EN) 170
Rational dynamic loads analysis for air cushion vehicles in random seaway or terrain. Robert J. Bartholomew 90
Reply by authors to P. R. Payne. Jerome S. Parsons, Raymond E. Goodson, and Fabio R. Goldschmied (TC) 128

Marine Vessel Systems, Submerged

Comment on "Shaping of axisymmetric bodies for minimum drag in incompressible flow." Peter R. Payne (TC) 127
Floating ocean thermal power plants and potential products. G. L. Dugger, H. L. Olsen, W. B. Shippen, E. J. Francis, and W. H. Avery (SA) 129
Reply by authors to P. R. Payne. Jerome S. Parsons, Raymond E. Goodson, and Fabio R. Goldschmied (TC) 128

Marine Vessel Systems, Surface

Advanced composites and their application to hydrofoils. L. B. Greszczuk, A. V. Hawley and T. White 81
Dynamic performance characteristics of an air cushion vehicle. J. A. Fein, A. H. Magnuson, and D. D. Moran 13
Hydrofoil performance in rough water. D. A. Jewell 142
Rational dynamic loads analysis for air cushion vehicles in ramdom seaway or terrain. Robert J. Bartholomew 90

Marine Vessel Trajectories, Stability, and Control

Coupled pitch and heave porpoising instability in hydrodynamic planing. Peter R. Payne (ERR) 48
Dynamic performance characteristics of an air cushion vehicle. J. A. Fein, A. H. Magnuson, and D. D. Moran 13
Nonlinear motion of an air-cushion vehicle over waves. L. J. Doctors 49

Marine Vessel Vibration

Effect of mesh size on the accuracy of finite-water added mass. C. H. Kim (EN) 125

Oceanography, Physical and Biological

Experimental investigation of a low velocity electrostatic current meter. James R. Williford and David L. Murphree (EN) 44
Measurement of surface-wave statistics. H. Guthart, K. S. Krishnan, and N. A. Peppers 149
Optimum filtering and smoothing of buoy wave data. Robert W. Severance Jr. 69
Statistical mechanics of ocean waves. Bruce J. West, J. Alex Thomson, and Kenneth M. Watson 25

STRUCTURAL MECHANICS AND MATERIALS

Structural Composite Materials (including Coatings)

Advanced composites and their application to hydrofoils. L. B. Greszczuk, A. V. Hawley and T. White 81

Research Facilities and Instrumentation

Comparison of measurements of waves from a boat with model tank results. L. W. Ward and R. van Hooff 99

LAUNCH VEHICLE AND MISSILE (LV/M) TECHNOLOGY

LV/M Mission Studies and Economics

Operational maritime satellites—An evolving concept. Robert E. Fenton 165

MARINE TECHNOLOGY

Marine Electric Power Systems

Floating ocean thermal power plants and potential products. G. L. Dugger, H. L. Olsen, W. B. Shippen, E. J. Francis, and W. H. Avery (SA) 129

Marine Hydrodynamics, Vessel and Control Surface

Analysis of three-dimensional potential flow around a ship hull. Akin Ecer, Joseph Eichers, and Theordore Bratanow 64
Calculations of the turbulent wake behind slender self-propelled bodies with a kinetic energy method. Roy C. Swanson Jr. and Joseph A. Schetz (EN) 78
Comparison of measurements of waves from a boat with model tank results. L. W. Ward and R. van Hooff 99
—Coupled pitch and heave porpoising instability in hydrodynamic planing. Peter R. Payne. (ERR) 48
Effect of mesh size on the accuracy of finite-water added mass. C. H. Kim (EN) 125
Hydrofoil performance in rough water. D. A. Jewell 142
Leading-edge rotating cylinder for boundary-layer control on lifting surfaces. W. S. Johnson, J. S. Tennant, and R. E. Stamps (EN) 76
Low-aspect-ratio flat-ship theory. E. O. Tuck 3
Note on the two force equations for a floating platform, A. Jin S. Chung (EN) 170
Technique for rapid friction factor fluid characterization. William K. George Jr., George B. Gurney, and Neil S. Berman 36

Marine Materials, Corrosion / Erosion

Advanced composites and their application to hydrofoils. L. B. Greszczuk, A. V. Hawley and T. White 81

Marine Mooring Systems and Cable Mechanics

Addition to the reply by author to a comment by P. R. Payne. D. W. Sallet (TC) 128
Motion of a cable used as a mooring. Harry E. Williams 107
Vortex-induced lift and drag on stationary and vibrating bluff bodies. Owen M. Griffin 160

U.S. POSTAL SERVICE

STATEMENT OF OWNERSHIP, MANAGEMENT AND CIRCULATION

(Act of August 12, 1970: Section 3685, Title 39, United States Code)

1. TITLE OF PUBLICATION: AIAA JOURNAL	2. DATE OF FILING: OCTOBER 1, 1975
3. FREQUENCY OF ISSUE: MONTHLY	3A. ANNUAL SUBSCRIPTION PRICE: $8.00

4. LOCATION OF KNOWN OFFICE OF PUBLICATION (Street, city, county, state and ZIP code) (Not printers): 1290 AVENUE of the AMERICAS NEW YORK NY 10019

5. LOCATION OF THE HEADQUARTERS OR GENERAL BUSINESS OFFICES OF THE PUBLISHERS (Not printers): SAME AS ABOVE

6. NAMES AND ADDRESSES OF PUBLISHER, EDITOR, AND MANAGING EDITOR

PUBLISHER (Name and address): AMERICAN INSTITUTE OF AERONAUTICS AND ASTRONAUTICS, 1290 AVENUE of the AMERICAS NEW YORK NY 10019

EDITOR (Name and address): GEORGE SUTTON SAME ADDRESS

MANAGING EDITOR (Name and address): JANE PATH SAME ADDRESS

7. OWNER (If owned by a corporation, its name and address must be stated and also immediately thereunder the names and addresses of stockholders owning or holding 1 percent or more of total amount of stock. If not owned by a corporation, the names and addresses of the individual owners must be given. If owned by a partnership or other unincorporated firm, its name and address, as well as that of each individual must be given.)

NAME	ADDRESS
AMERICAN INSTITUTE OF AERONAUTICS AND ASTRONAUTICS	1290 AVENUE of the AMERICAS NEW YORK NY 10019

8. KNOWN BONDHOLDERS, MORTGAGEES, AND OTHER SECURITY HOLDERS OWNING OR HOLDING 1 PERCENT OR MORE OF TOTAL AMOUNT OF BONDS, MORTGAGES OR OTHER SECURITIES (If there are none, so state)

NAME	ADDRESS
NONE	

9. FOR OPTIONAL COMPLETION BY PUBLISHERS MAILING AT THE REGULAR RATES (Section 132.121, Postal Service Manual): 39 U.S.C. 3626 provides in pertinent part: "No person who would have been entitled to mail matter under former section 4359 of this title shall mail such matter at the rates provided under this subsection unless he files annually with the Postal Service a written request for permission to mail matter at such rates."

In accordance with the provisions of this statute, I hereby request permission to mail the publication named in Item 1 at the reduced postage rates presently authorized by 39 U.S.C. 3626.

(Signature and title of editor, publisher, business manager, or owner)

10. FOR COMPLETION BY NONPROFIT ORGANIZATIONS AUTHORIZED TO MAIL AT SPECIAL RATES (Section 132.122 Postal Service Manual): (Check one)

The purpose, function and nonprofit status of this organization and the exempt status for Federal income tax purposes: ☒ Have not changed during preceding 12 months ☐ Have changed during preceding 12 months (If changed, publisher must submit explanation of change with this statement.)

11. EXTENT AND NATURE OF CIRCULATION	AVERAGE NO. COPIES EACH ISSUE DURING PRECEDING 12 MONTHS	ACTUAL NUMBER OF COPIES OF SINGLE ISSUE PUBLISHED NEAREST TO FILING DATE
A. TOTAL NO. COPIES PRINTED (Net Press Run)	6,438	6,400
B. PAID CIRCULATION 1. SALES THROUGH DEALERS AND CARRIERS, STREET VENDORS AND COUNTER SALES	-----	-----
2. MAIL SUBSCRIPTIONS	5,556	5,553
C. TOTAL PAID CIRCULATION	5,556	5,553
D. FREE DISTRIBUTION BY MAIL, CARRIER OR OTHER MEANS SAMPLES, COMPLIMENTARY, AND OTHER FREE COPIES	270	268
E. TOTAL DISTRIBUTION (Sum of C and D)	5,826	5,821
F. COPIES NOT DISTRIBUTED 1. OFFICE USE, LEFT OVER, UNACCOUNTED, SPOILED AFTER PRINTING	592	579
2. RETURNS FROM NEWS AGENTS	-----	-----
G. TOTAL (Sum of E & F - should equal net press run shown in A)	6,418	6,400

I certify that the statements made by me above are correct and complete.

SIGNATURE OF EDITOR, PUBLISHER, BUSINESS MANAGER, OR OWNER
